SLNHS Meeting 2018 #6

“A collection of bird and animal photographs”
by Skanda de Saram

Monday - 20th August 2018 - 5:30pm
Maths Department Auditorium
Colombo University Main Building (Upstairs)

All are welcome

Skanda's photography has mainly focused on birds in flight and on landscapes. His pictures of bats, photographed in Sri Lanka, piqued the interest of Brock Fenton, a world renowned authority on bats.

One of Skanda's pictures appears in Brock's recent book "Bats-A world of Science and Mystery" (co-authored with Nancy Simmons).

Some of Skanda's photographs also appear in "Mammals of Sri Lanka" by Asoka Yapa and Gamini Ratnavira.
